

To preserve and keep our workers' health and safety according to full conformity and respect of the legal prescriptions and current rules, Forgia Rapida srl considers an important opportunity to implant a System in conformity with the rule OHSAS 18001:2007 to:

- Find out and adopt processes, technologies, surveillance and control systems, devices of collective and individual protection able to decrease risks to workers, favoring the accidents' prevention and its possible consequences for health, in order to have a continuous improvement;
- Be in favor of all company workers' involvement, because they constantly could achieve a major consciousness about their role's importance for a proper management of production processes and progress of working conditions;
- Increase constantly, through specific information and training staff programs, all Managers, employers and workers' quality and responsibility;
- Promote the principle of protecting health and safety on working places, to suppliers and contractors who work for Forgia Rapida srl, developing the activities' cooperation and coordination, requiring the improvement of operative praxis in coherence of what has been previously established and by Company itself;
- Communicate and cooperate to guarantee clarity and transparency with Representative of Workers' Safety, the third parties involved in it and the Authorities;
- Realize innovative and improving programs supported by adequate prevention and protection measures which goal consists in diminishing significantly the accidents' number contributing to supply adequate human, technological and financial resources.

This policy is the reference to establishing and reviewing the objectives and goals of the Security Management System: it is communicated to the staff members and to all persons who enter, for various reasons, within Forgia Rapida srl.

It is also made available to interested parties.
